Sports heroes inspiring New Zealanders to be environmental champions.

Case study: Hamilton Golf Club

Hamilton Golf Club, on the prestigious St. Andrews course, was one of the first to join the programme in September 2011. LiteClub upgraded 60 energy hungry light bulbs to brighter, more efficient Philips lighting. Over the 8000 hours that these new bulbs typically last, the club will save over \$9000.

Twelve hand basins were fitted with tap aerators. Collectively, this will reduce water consumption by tens of thousands of litres each year. The club's hot water cylinder pipes were also insulated with lagging to improve heat efficiency.

LiteClub works closely with Powershop, which prides itself on trying to get sports clubs great deals. By switching their electricity supply to Powershop, Hamilton Golf Club reduced its electricity bill by 9%. This will save \$615 per year.

We also prepared a detailed report, setting out how Hamilton Golf Club could go further to improve efficiency, freeing up more cash.

"Hamilton Golf Club will save more than \$9,000 via LiteClub."

LiteClub is an entirely free service - there are no catches.

How LiteClub works:

1. Once registered, a dedicated team visits the club to install free energy-saving products (energy efficient light bulbs, aerators, insulation).
2. We generate a report setting out how the club may further improve efficiency and free up more cash.
3. Via club newsletters, we get club members involved by encouraging them to make the same positive changes at home.

Benefits:

1. **Freeing up money for sport.** We pinpoint opportunities for clubs to save money by being more efficient with electricity, water and waste. We also create new fundraising opportunities for clubs, through offers to club members.
2. **Improving environmental footprints.** By coaching, equipping and inspiring clubs to be lite-footed.
3. **Strengthening communities.** Encouraging co-operation beyond the usual field of play.
